PROFESSIONAL SUMMARY

Senior Full Stack Developer with 8+ years of experience delivering enterprise SaaS applications for global maritime and e-commerce industries. Proven track record architecting platforms serving 200+ users across 78 international locations, leading technology modernization initiatives, and integrating complex third-party APIs. Recognized for optimizing system performance by 30%, reducing manual workflows by 40%, and consistently delivering projects with 95%+ on-time completion rates. Strong collaborator in Agile environments with expertise spanning the full software development lifecycle from requirements gathering to production deployment.

PROFESSIONAL EXPERIENCE

Software Engineer L3 | November 2022 - Present

ProdEngines Private Limited (a SpeeHive subsidiary) - Palakkad, Kerala, India.

- Architected and maintained enterprise bunker fuel procurement platform serving 200+ users across 78 global ports, managing marine fuel procurement, operations, claims, and invoicing workflows with 9 core functional modules
- Led Angular 10→18 modernization and OpenIddict authentication migration, replacing legacy IdentityServer4 implementation with OAuth 2.0/OIDC-compliant authentication and role-based access control (RBAC) using JWT tokens
- Integrated third-party maritime data APIs (MarineTraffic, Lloyds List Intelligence) for real-time vessel tracking, port intelligence, and fuel pricing data synchronization
- Developed RESTful APIs using ASP.NET Core 8, ABP Framework, and Entity Framework Core to enable secure data exchange between Angular frontend and backend systems with OData query support
- Implemented Single Sign-On (SSO) with Azure AD integration and multi-tenant architecture supporting role-based permissions across shipowners, fuel traders, and operations teams
- Optimized database queries and API response handling using SQL Server stored procedures and LINQ, achieving 30% improvement in response times for high-volume inquiry and reporting modules
- Automated business workflows with SignalR real-time notifications, reducing manual effort by 40% and improving operational efficiency across claim approvals and invoice generation processes
- Collaborated in Agile/Scrum ceremonies including sprint planning, daily standups, design discussions, and code reviews to deliver scalable features iteratively with 2-week sprint cycles.

Full Stack Developer | May 2019 - November 2022

Collective Dallas - Remote - Contract - Frisco, Texas, United States.

- Developed frontend components for multiple e-commerce and corporate web applications using HTML5, CSS3, JavaScript, jQuery, and Bootstrap, ensuring responsive design across mobile, tablet, and desktop devices
- Collaborated with UI/UX designers and backend teams to convert PSD/Figma designs into pixel-perfect, cross-browser compatible web interfaces with 95%+ design fidelity
- Built and customized WordPress and PHP-based applications using CodeIgniter framework, implementing custom themes, plugins, and database integrations to support client business requirements
- Participated in Agile ceremonies, sprint planning, and peer code reviews to ensure on-time delivery of high-quality frontend features within 2-week development cycles.

Senior UX/UI Developer | June 2015 - April 2019

Techleaf Solutions Private Limited - Madurai, Tamil Nadu, India.

- Developed and maintained 20+ responsive business websites using WordPress, WooCommerce, PHP, HTML5, CSS3, and JavaScript for small and medium-sized e-commerce and corporate clients

- Customized WordPress themes and implemented PHP-based functionality enhancements including payment gateway integrations, custom post types, and REST API endpoints
- Improved frontend performance by optimizing CSS/JavaScript delivery, implementing lazy loading, and ensuring cross-browser compatibility, resulting in 25% faster page load times
- Collaborated asynchronously with remote stakeholders across US time zones using Trello, Slack, and Basecamp to deliver website enhancements and provide ongoing technical support

UI/UX Designer | October 2014 - May 2015

Southern Soft Solutions - Internship - Madurai, Tamil Nadu, India.

- Designed and developed responsive web pages and email newsletters using HTML5, CSS3, and jQuery.
- Gained hands-on exposure to frontend best practices, usability principles, and cross-browser compatibility testing across Chrome, Firefox, Safari, and IE browsers.

Operations Associate | September 2013 - September 2014

Solartis Inc. | Madurai, Tamil Nadu, India.

- Supported US insurance client operations by processing data, validating system outputs, and ensuring accuracy in reports within defined SLAs
- Worked with internal tools and workflows to deliver error-free outputs, maintaining 99%+ accuracy rate across daily deliverables

KEY PROJECTS

GeoStem - Enterprise Marine Fuel Management Platform | November 2022 - Present

ProdEngines Private Limited | Tech Stack: Angular 18, ASP.NET Core 8, ABP Framework, OpenIddict, SQL Server

- Architected enterprise SaaS platform serving 200+ users across 78 global ports, managing end-to-end marine fuel procurement, operations, claims, invoicing, and reporting workflows
- Built core functional modules (Inquiry and Vessel Managements, Quotations, Operations, Claims, Invoicing, Payments, Port Master Data, Analytics & Reporting) using ABP Framework and Angular with Material Design components
- Developed RESTful APIs using ASP.NET Core 8 and Entity Framework Core with OData query support, implementing CQRS pattern and repository pattern for scalable data access
- Implemented secure authentication and authorization using OpenIddict (OAuth 2.0/OIDC), JWT tokens, and Azure AD SSO with role-based access control (RBAC) supporting multi-tenant architecture
- Designed interactive dashboards with real-time KPIs including volume tracking, revenue analysis, margin reports, and operational metrics using SignalR for live updates
- Collaborated with cross-functional Agile/Scrum teams in sprint planning, design reviews, and code reviews to iteratively deliver features with 95%+ on-time delivery rate.

TECHNICAL SKILLS

Frontend: Angular (v10-v18), TypeScript, JavaScript, HTML5, CSS3, SCSS, Bootstrap, Material Design, RxJS, Responsive Design

Backend: ASP.NET Core 8, Web API, C#, Entity Framework Core, LINQ, ABP Framework, SignalR, OData

Database: SQL Server, T-SQL, Stored Procedures, Query Optimization, Database Design.

Security & Authentication: JWT Authentication, OAuth 2.0, OpenIddict, IdentityServer4, Single Sign-On (SSO), Azure AD.

Version Control & Tools: Git, Azure DevOps, GitHub, Visual Studio, VS Code, Postman, Swagger, Azure Pipelines (CI/CD)

Architecture & Methodologies: OOP, SOLID Principles, CQRS, Repository Pattern, Microservices Architecture, RESTful API Design, Agile/Scrum, Code Reviews, Performance Optimization

Additional: PHP, WordPress, WooCommerce, CodeIgniter, jQuery, Figma, Adobe Photoshop

EDUCATION

Master of Computer Applications (MCA)

Anna University | Bharath Niketan Engineering College | Teni, Tamil Nadu, India | 2010 - 2013 | CGPA: 7.87/10

Bachelor of Computer Science (B.Sc. Computer Science)

Madurai Kamaraj University | PKN Arts and Science College | Madurai, Tamil Nadu, India | 2007 - 2010 | 59.3%
