PROFESSIONAL SUMMARY

Senior Full Stack Developer with 8+ years of software and web development experience, including 4+ years **building** enterprise SaaS applications using Angular, ASP.NET Core, C#, SQL Server, and ABP Framework. Experienced in developing scalable enterprise applications, RESTful APIs, secure authentication and authorization, real-time workflows, application modernization, and third-party integrations. Contributed to enterprise platforms supporting 200+ users across 78 global ports and improved application and database performance by approximately 30% through query and backend optimization. Experienced in mentoring developers, conducting code reviews, resolving complex technical issues, and collaborating with cross-functional teams throughout the software development lifecycle.

CORE SKILLS

Frontend: Angular (10-18), TypeScript, JavaScript, HTML5, CSS3, SCSS, Bootstrap, RxJS

Backend: ASP.NET Core, C#, REST APIs, Entity Framework Core, LINQ, OData, SignalR, Hangfire, ABP Framework

Database: SQL Server, T-SQL, Stored Procedures, Query Optimization

Security: OpenIddict, Azure AD, JWT Authentication, OAuth 2.0, Role-Based Access Control (RBAC)

Architecture & Practices: SOLID Principles, Repository Pattern, Dependency Injection, RESTful API Design, Agile/Scrum

Tools & DevOps: Git, Azure DevOps, CI/CD

Other Technologies: PHP, WordPress, WooCommerce, Codelgniter, jQuery, Figma, Adobe Photoshop

PROFESSIONAL EXPERIENCE

Software Engineer L3 | November 2022 - Present

ProdEngines Pvt. Ltd. (A SpeeHive Subsidiary) | Full-time | Palakkad, Kerala, India

Develop enterprise SaaS applications for maritime logistics, agency operations, and workflow automation using **Angular, ASP.NET Core, SQL Server, and ABP Framework**.

- Engineered and maintained enterprise SaaS applications supporting marine fuel procurement, agency operations, claims management, invoicing, payments, and reporting for global maritime customers.
- Developed scalable Angular frontend modules and ASP.NET Core backend services using Entity Framework Core, LINQ, and ABP Framework to support secure enterprise workflows.
- Designed and implemented **RESTful APIs** and integrations with third-party maritime services for vessel tracking, port intelligence, and operational data synchronization.
- Implemented **Azure AD Single Sign-On (SSO), OpenIddict, JWT Authentication, OAuth 2.0, and Role-Based Access Control (RBAC)** for secure enterprise applications.
- Optimized **SQL Server** stored procedures, database queries, and backend services, improving application performance and reducing reporting response times by approximately **30%**.
- Automated enterprise workflows using SignalR-based real-time notifications, reducing manual operational effort and improving workflow visibility.
- Developed reusable Angular components and shared services to improve code consistency and reduce duplicate implementation across application modules.
- Mentored 2 software developers and 1 junior developer through code reviews, technical guidance, debugging support, and implementation assistance while collaborating with the Technical Lead.
- Contributed to architecture discussions, sprint planning, application modernization, code reviews, testing, and production deployments across GeoStem, Focal-i, and Learning Management System (LMS) projects.

Full Stack Developer | May 2019 - November 2022

Collective Dallas | Remote Contract | Frisco, Texas, United States

- Developed and maintained responsive WordPress business and e-commerce websites using **PHP, WordPress, WooCommerce, JavaScript, Bootstrap, HTML5, CSS3, and jQuery**.
- Converted Figma and Photoshop designs into responsive, cross-browser compatible production websites.
- Customized WordPress themes, plugins, and reusable PHP components to implement client-specific business requirements.
- Integrated REST APIs and third-party plugins to extend website functionality and business workflows.
- Maintained and optimized existing websites for performance, responsiveness, browser compatibility, SEO readiness, and overall user experience.

Senior UX/UI Developer | June 2015 - April 2019

Techleaf Solutions Pvt. Ltd. | Full-time | Madurai, Tamil Nadu, India

- Developed responsive web applications and business websites using **PHP, WordPress, CodeIgniter, HTML5, CSS3, JavaScript**, and **jQuery**.
- Converted Photoshop designs into responsive, pixel-accurate web interfaces with cross-browser compatibility.
- Built and customized WordPress themes, plugins, and CodeIgniter modules based on client requirements.
- Developed RTL (Right-to-Left) websites with Hebrew language support for Israel-based clients.
- Led and mentored 2 frontend developers through technical guidance, task coordination, code reviews, and implementation support.
- Collaborated directly with domestic and international clients, designers, developers, and QA engineers throughout development and delivery.

UI/UX Designer | October 2014 - May 2015

Southern Soft Solutions | Internship | Madurai, Tamil Nadu, India

- Designed responsive website layouts, landing pages, and email templates for client projects.
- Developed frontend interfaces using HTML5, CSS3, and jQuery while assisting with responsive design, usability, and cross-browser compatibility.

Operations Associate | September 2013 - September 2014

Solartis Technology Services Pvt. Ltd. | Full-time | Madurai, Tamil Nadu, India

- Supported US insurance operations by processing and validating business data and reports while ensuring accuracy and SLA compliance.

KEY PROJECTS

GeoStem - Marine Fuel Management Platform

ProdEngines Pvt. Ltd. | November 2022 - January 2026

Tech Stack: Angular 18 | ASP.NET Core | ABP Framework | OpenIddict | SQL Server | Azure AD | SignalR

- Developed enterprise modules supporting marine fuel procurement, operations, claims, invoicing, payments, and reporting for 200+ users across 78 global ports.
- Built Angular frontend modules and ASP.NET Core REST APIs using Entity Framework Core and ABP Framework.
- Implemented Azure AD Single Sign-On (SSO), OpenIddict authentication, JWT-based authorization, and SignalR real-time notifications.
- Optimized backend and database operations using SQL Server, Repository Pattern, stored procedures, and query optimization techniques.
- Collaborated with stakeholders and cross-functional teams to translate complex maritime business requirements into scalable technical solutions.

Focal-i - Enterprise Agency Platform Modernization

ProdEngines Pvt. Ltd. | February 2026 - March 2026

Tech Stack: Angular 18 | ASP.NET Core 8 | ABP Framework | OpenIddict | SQL Server | OData | NGXS

- Modernized an enterprise application by upgrading Angular 10 to Angular 18, .NET Core 3.1 to .NET 8, and ABP Framework v3 to v8.
- Migrated authentication from IdentityServer4 to OpenIddict using OAuth 2.0/OIDC.
- Resolved framework breaking changes, package dependency conflicts, and deployment compatibility issues introduced during modernization.
- Updated Angular ecosystem libraries and stabilized application builds across Development, QA, UAT, and Production environments.
- Collaborated with development teams to validate the framework migration and ensure a stable transition to the modernized platform.

EDUCATION

Master of Computer Applications (MCA)

Anna University | Bharath Niketan Engineering College | 2010 - 2013 | 7.87 CGPA
